

# INFORMATIONS ABOUT SEK WIRELESS NETWORK

## DEAR COLLEAGUE / STUDENT!

The „**EDUROAM**” wireless network is available for all of our colleagues and active students at the Eötvös Loránd University Savaria University Center and at the Pável Ágoston dormitories.

This service is compatible almost all of WiFi capable devices (notebook, mobile phone etc.).

To use this network you need an unique account.

If you are not work/learn on ELTE, but your institution is connected to the Eduroam, you can use your own institution id to access this network.

## REQUEST ACCESS

You can request access at our [costumer portal](#). To enter this site you need your IIG ID, this is the same as your Caesar ID (like username and like password). If you don't have IIG ID you can login with your Neptun code and Neptun password and after it you can create the IIG ID.

After login choose the „WiFi access” option and follow the steps.

## SETUP GUIDE

Choose the „eduroam” SSID (network ID) on your device. The username is your caesar ID and '@elte.hu' for example: xy@elte.hu, the password is your caesar password.

At the „CA certificate” row choose „Do not validate” if necessary and if the device asks choose „trust” sign at the network settings.

If you have any further question please write an e-mail to [informatika@sek.elte.hu](mailto:informatika@sek.elte.hu).
